Asian Liberals
and Democrats

40th CALD Executive Committee Meeting

PROGRAMME

18-23 October 2019 | Taipei, Taiwan

FRIEDRICH NAUMANN
FOUNDATION *For Freedom.*
Southeast and East Asia

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

Our democratic system makes us open to diverse and innovative ideas, giving us the flexibility to break the mold when the mold no longer fits.

Tsai Ing-wen

President of Taiwan

(Speech at Columbia University, 12 July 2019)

40th CALD Executive Committee Meeting *Democracy 4.0: Innovating Democracy Through Technology* *Defending Democracy Against Disinformation*

18-23 October 2019

Taipei, Taiwan

Democracy may be beaten, but it is not defeated. The openness of democracy to “diverse and innovative ideas”, as what Taiwanese President Tsai Ing-wen noted in the quote above, is also what would make it survive in this era of authoritarianism, illiberalism and populism.

But first, democracy must recognize its limitations. Darshana Narayanan of The Governance Lab, New York University observes:

Current forms of democracy exclude most people from political decision-making. We elect representatives and participate in the occasional referendums, but we mainly remain on the outside. The result is that a handful of people in power dictate what ought to be collective decisions. What we have now is hardly a democracy, or at least, not a democracy that we should settle for.

She noted, however, that technology, coupled with political will, can make democracy great again. Examples of how technology makes democracy more open, inclusive, direct and interactive abound:

- *vTaiwan* – This brings citizens and government together to deliberate and “co-create” legislation related to the digital sphere. The process uses human facilitators to lead the discussions, as well as a machine-learning-based open-source system called *Polis* for people to exchange views online, and for analyzing public sentiment. The *Polis* software is now used by public authorities in United States, Canada and Singapore.
- *Decide Madrid* - Developed in 2015 by the Madrid City Council, this platform runs on a free software called *Consul*. It enables residents to propose, support and vote on policies for the city, and ensures transparency in all city proceedings, including budgeting. The *Consul* software is now used by cities in 33 countries, including Buenos Aires, Paris and Rome.

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

- *Better Reykjavik* – This online consultation forum gives the citizens a chance to present their ideas on issues regarding services and operations of the City of Reykjavík. Anyone can view the open forum, and registered users who approve the terms of participation can participate in the forum. To date, around 800 citizen initiatives were approved by the city council within seven years.

The cases above show how technology can transform democracy by making citizens front and center of the political process. Taiwan’s Digital Minister Audrey Tang summarizes it in this way: “The idea is to bring technology into the spaces where citizens live, rather than expect citizens to enter the space of technology. The premise is this: the government must first trust the people with agenda-setting power; then the people can make democracy work.”

Technology, however, can be a double-edged sword. As what President Tsai pointed out in her Columbia University speech: “In the digital age, disinformation can become fact in a matter of hours... Authoritarian governments seek to exploit press freedoms unique to democratic societies to sow dissent among us. They hope to make us question our political systems and lose faith in democracy.” Hence, political innovation, in this day and age, should also take into consideration ways to address disinformation or fake news.

Recognizing the potentials of technology to revive (and also damage) democracy, the Council of Asian Liberals and Democrats (CALD), in cooperation with the Democratic Progressive Party (DPP) and with the support of the Friedrich Naumann Foundation for Freedom (FNF) and National Democratic Institute for International affairs (NDI), is organizing a series of events in Taipei, Taiwan on 18-23 October 2019. These events include:

- *Democracy 4.0: Innovating Democracy Through Technology (19-20 October 2019)* – A forum and study tour, organized with the support of Taiwan’s Digital Ministry, which hope to identify and promote good practices on how technology creates opportunities for citizen empowerment and promotes participation in governance.
- *Defending Democracy Against Disinformation (21 October 2019)* – A seminar-workshop that aims to bring key stakeholders on the issue of curbing disinformation, misinformation and hate speech from a political perspective.
- *40th CALD Executive Committee Meeting (22 October 2019)* - A regular meeting among CALD members and partners that tackles both political and administrative issues that impinge on the operation of CALD as a liberal and democratic organization.

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

General and Specific Event Objectives: The events hope to identify and promote good practices on how technology creates opportunities for citizen empowerment and promotes participation in governance in the era of disinformation or fake news. More specifically, they aim to achieve the following objectives:

- To describe how new technologies work and their implications for elections, campaigning, governance, among other political issues;
- To demonstrate how new technologies can help solve governance issues and problems;
- To explain how new technologies can be harnessed by political parties in order to improve their organizational operations and engagement with the public; and
- To analyze, with various stakeholders, how technology amplifies disinformation, and how technology can be used to counter it.

Schedule of Activities (18 October, Friday)

Arrival / Welcome Dinner

Variable	<p>Arrival and Check in at the hotel</p> <p>The Sherwood Taipei Address: No. 111號, Section 3, Minsheng East Road, Songshan District, Taipei City, Taiwan 105 Phone: +886 2 2718 1188</p>
19:00-21:00	<p>Welcome Dinner <i>Hosted by the Democratic Progressive Party of Taiwan</i> <i>Venue: Ching Room, 3/F The Sherwood Taipei</i></p> <p><i>Welcome Remarks</i></p> <p>Ching-Yi Lin, MP Director, Department of International Affairs Democratic Progressive Party Member, Legislative Yuan, <i>Taiwan</i></p> <p>Bi-khim Hsiao, MP CALD Chairperson Member, Legislative Yuan, <i>Taiwan</i></p>

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

Schedule of Activities (19 October, Saturday)

Democracy 4.0 Forum / Free Night

Venue: Ching Room, 3/F The Sherwood Taipei

06:30-08:30	Breakfast <i>Venue: B-one Buffet Restaurant, B1 The Sherwood Taipei</i>
08:30-09:00	Registration <i>Venue: Ching Room Foyer, 3/F The Sherwood Taipei</i>
09:00-10:30	<p>Opening Session</p> <p><i>The opening session aims to set the tone for a more detailed discussion of the workshop theme, “Democracy 4.0: Innovating Democracy through Technology”, in the succeeding panels. More specifically, it hopes to respond to the general question: “How can liberals and democrats utilize new technologies to make democracy more inclusive and responsive?”</i></p> <p><i>Session Chair</i></p> <p>Chih-Wei Chen CALD Secretary General Deputy Director for International Affairs, Democratic Progressive Party, <i>Taiwan</i></p> <p><i>Opening Remarks</i></p> <p>Wen-Jia Luo Secretary General Democratic Progressive Party, <i>Taiwan</i></p> <p>Pierre Gearra Arab Liberal Federation National Liberal Party, <i>Lebanon</i></p> <p>Dirk Kunze Regional Director, Middle East and North Africa Friedrich Naumann Foundation for Freedom, <i>Germany</i></p> <p>Armin Reinartz – via Virtual Reality Head of Office, Global Innovation Hub Friedrich Naumann Foundation for Freedom, <i>Hong Kong</i></p>

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

	<p>Ching-Yi Lin, MP Director, Department of International Affairs Democratic Progressive Party Member, Legislative Yuan, <i>Taiwan</i></p> <p><i>Keynote Address</i></p> <p>Joseph Wu Minister of Foreign Affairs, <i>Taiwan</i></p>
<p>10:30-11:00</p>	<p>Group Photo</p> <p>Coffee/Tea Break</p>
<p>11:00-12:30</p>	<p>Session I: Understanding the Value of Technology in Politics</p> <p><i>What are open source, blockchain and artificial intelligence and what are their implications for politics? Open source refers to something that can be modified or shared because of its public accessibility. Open source projects and initiatives encourage open exchange, transparency, collaborative participation, community development, and the like. Blockchain is a distributed database which a single entity cannot control. It is a kind of self-auditing ecosystem that is transparent and incorruptible and reconciles every transaction that occurs in it in ten-minute interval. At present, the finance sector is a major user of blockchain, although other sectors (i.e. healthcare) are following suit. In politics, the use of blockchain in elections has already been pilot-tested in Sierra Leone in March 2018. Artificial intelligence (AI), on the other hand, deals with the creation of intelligent machines that work and react like humans. In this session, the value of open source, blockchain technology and artificial intelligence in politics (i.e. campaigning, elections, governmental services) will be discussed, as well as the possible issues that may arise from their use.</i></p> <p><i>Session Chair</i></p> <p>Siripa Intavichein Chairperson, CALD Youth Democrat Party, <i>Thailand</i></p>

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

	<p><i>Speakers</i></p> <p>Frank van Dalens – <i>via Zoom</i> CEO, E-Canvasser & Chaiperson, Political Academy, <i>The Netherlands</i></p> <p>Max Chen Public Policy Manager Facebook, <i>Taiwan</i></p> <p>Chung-Kai Sin Individual Member, Council of Asian Liberals and Democrats Former Member of Legislative Council (Information Technology Sector), <i>Hong Kong</i></p> <p>Edwin Lacierda Co-Founder, PayMongo Former Presidential Spokesperson, President Benigno Simeon Aquino III (2010-2016), <i>Philippines</i></p> <p><i>Open Forum</i></p>
12:30-14:00	<p>Lunch <i>Venue: Yuan Room, 3/F The Sherwood Taipei</i></p>
14:00-15:00	<p>Keynote Speech</p> <p>Audrey Tang Digital Minister, <i>Taiwan</i></p>
15:00-16:00	<p>Session II: Hacking Solutions to Governance Issues</p> <p><i>What governance issues do the general public want to address using technology? To respond to this question, a “regional wishing well” was set up by the forum organizers – a webpage where members of the general public cast their vote on what they think is the most pressing issue that they want to be solved by technology. The top 3 governance issues will be presented, and possible solutions will be pitched by winners of Taiwan’s Presidential Hackathon to be determined in consultation with Taiwan’s Digital Ministry.</i></p>

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

	<p><i>Session Chair</i></p> <p>Jason Gonzales Member of the Provincial Board, 3rd district of Iloilo Province Director General, Liberal Party, <i>Philippines</i></p> <p><i>Speakers</i></p> <p>Audrey Tang Digital Minister, <i>Taiwan</i></p> <p>Shwu-Feng Tsay Director General, Department of Nursing and Health Care Ministry of Health and Welfare, <i>Taiwan</i></p> <p>Heng-Hsin Tung National Yang-Ming University, <i>Taiwan</i></p> <p><i>Open Forum</i></p>
16:00-16:30	Coffee/Tea Break
16:30-18:00	<p>Session III: Building Political Parties of the Future</p> <p><i>How would a successful party of the future look like? In a world where traditional political parties are challenged by the decline of their traditional clientele and rise of alternative players, how should they innovate democracy through technology and capture the enormous demand for civic engagement in the process? This session looks into how new technologies can be harnessed by political parties in order to improve their organizational operations and engagement with the public.</i></p> <p><i>Session Chair</i></p> <p>Emily Lau Chairperson, International Affairs Committee, Democratic Party Former Member of Legislative Council, <i>Hong Kong</i></p>

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

	<p><i>Speakers</i></p> <p>Jonathan Moakes <i>(via Zoom)</i> Vice-President of Campaigns, Greenberg Quinlan Rosner (GQR) Former Chief Executive & Chief Strategist, Democratic Alliance, <i>South Africa</i></p> <p>Putri Ayu Anisya Member, Regional People's Representative Council South Tangerang, Banten Province Indonesian Democratic Party of Struggle, <i>Indonesia</i></p> <p>Chih-Wei Chen CALD Secretary General Deputy Director for International Affairs, Democratic Progressive Party, <i>Taiwan</i></p> <p><i>Open Forum</i></p>
	<p>Free Night</p>

Schedule of Activities (20 October, Sunday)

Democracy 4.0 Study Tour / Gala Dinner

06:30-08:30	<p>Breakfast <i>Venue: B-one Buffet Restaurant, B1 The Sherwood Taipei</i></p>
08:30	<p>Leave the hotel for the study tour</p>
09:00-10:00	<p>Tour of the Social Innovation Lab</p> <p><i>Social Innovation Lab, which was inaugurated in October 2017 at the former Air Force headquarters, aims to be the hub for social innovation in Taiwan. Minister Audrey Tang holds a weekly drop-in session at the center, where citizens and entrepreneurs are welcome to come and talk to her one-on-one about social enterprise issues.</i></p>
10:00-12:00	<p>CALD-ALF Dialogue (with the participation of RELIAL and ALN)</p>
12:00-13:00	<p>Lunch <i>(Lunchbox at Social Innovation Lab)</i></p>

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

13:30	Leave lunch venue for NPO Hub Taipei
14:00-16:30	<p>Visit to NPO Hub Taipei</p> <p><i>NPO HUB Taipei turned the 50-year old apartment building (previously the TFGHS Teacher's Residence) into a dynamic and organic workspace for nonprofits and social innovation organizations. It is backed and powered by Impact Hub Taipei, which incubates and accelerates more impact organizations and social innovation entrepreneurs.</i></p>
16:30	Leave for dinner venue
18:00-21:00	<p>Gala Dinner</p> <p><i>Venue: Shi Yang Culture No. 6, Lane 366, Section 3, Xiwang Road, Xizhi District, New Taipei City</i></p> <p><i>Launch of Youthopia (Winner of CALD Youth's Liberal Hackathon, July 2019)</i></p>
21:00	Return to the hotel

Schedule of Activities (21 October, Monday)

Defending Democracy Against Disinformation / Working Groups with Dinner

Defending Democracy Against Disinformation: Stakeholder Analysis and Intervention

Information is power. The use and abuse of information, therefore, has always been part of politics since time immemorial. The recent advances in information and communication technologies, however, have radically changed the way information and politics intersect. On the one hand, the advent of the Internet and mobile devices has democratized knowledge and information, providing the people with the tools to become informed and active citizens in a vibrant democracy. On the other hand, information and communication technologies have also become instruments to create, distribute and amplify disinformation, misinformation and hate speech, which, in turn, threaten to undermine the very foundations of democratic society.

“Fake news” is the more straightforward and more commonly used term associated with disinformation and misinformation. Some say that the concept is an oxymoron, as “news” implies verifiable information in the public interest, and

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

any information that does not meet these standards does not deserve the label of news. For this reason, this workshop would use the terms “disinformation” and “misinformation” instead. Disinformation refers to “deliberate (often orchestrated) attempts to confuse or manipulate people through delivering dishonest information to them.” In contrast, misinformation pertains to “misleading information created or disseminated without manipulative or malicious intent.” (UNESCO, 2018). Lastly, hate speech (sometimes called “mal-information”) consists of “verbal or non-verbal communication that involves hostility directed towards particular social groups, most often on the grounds of race and ethnicity, gender, sexual orientation, age, disability, etc.” (Oxford Constitutional Law, 2017).

Disinformation, misinformation and hate speech affect not only politics but also the society at large. The shared norms, values and understandings, which are necessary for the effective functioning of every society, have been put into question, even discarded. The societal institutions that used to safeguard moral standards and professional integrity, such as established religions and traditional media, have now become subjects of distrust and hate. In a world of digital disinformation, everyone has become vulnerable – to being a target and unwitting purveyor of disinformation/misinformation, to data hacking and harvesting, to cyber-attacks and cyber-bullying, even surveillance and censorship. Given the wide-ranging scope of the problem, the possible solutions should also mobilize all stakeholders – the international community, government institutions, civil society organizations, the media, tech and social media companies, educational institutions, even the family.

This seminar-workshop aims to bring key stakeholders on the issue of curbing disinformation, misinformation and hate speech from a political perspective. Three (3) groups of key stakeholders are pre-identified; they are: 1) journalists and civil society activists who can undertake media and information literacy campaigns; 2) tech and social media companies which can adopt self-regulatory standards and measures; and 3) political leaders and legislators who can intervene using appropriate policy or legislation.

Stakeholder analysis, albeit modified to suit the workshop’s purpose, will be used as the guiding methodology. It is defined as “the process of systematically gathering and analyzing qualitative information to determine whose interests should be taken into account when developing and/or implementing a policy or program” (Schmeer, n.d.).

The seminar-workshop divides the different steps in stakeholder analysis into the day-long seminar-workshop. The entire ecosystem of disinformation, misinformation and hate speech, along with key stakeholders, will be described

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

through panel presentations. The digital disinformation ecosystem will also be discussed in the context of recently concluded and upcoming elections in Asia, where fake news and hate speech have figured/are figuring prominently. Afterwards, the seminar-workshop participants will be divided into three (3) working groups based on the key stakeholders listed above. The working groups, with the guidance of relevant panel speakers from the previous sessions, will then discuss and analyze the main characteristics (knowledge, position, interest, alliances, resources, power, leadership) of the key stakeholders under consideration, in the context of the Asian region or an agreed upon Asian country. Based on their analysis, the working groups should also draw a list of recommended actions and next steps. The working group results will then be presented in the plenary.

With the theme “Defending Democracy Against Disinformation: Stakeholders’ Analysis and Intervention”, the specific objectives of the seminar-workshop are:

- To understand, in general terms, the ecosystem of disinformation, misinformation and hate speech, including but not limited to their proponents, types, dimensions and impacts;
- To describe how disinformation, misinformation and hate speech impinged on the recently concluded/upcoming elections in Asia;
- To discuss best practices in curbing disinformation, misinformation and hate speech from the standpoint of journalists and civil society activists, tech and social media companies, and political leaders and legislators;
- To conduct a stakeholders’ analysis of the three key groups of stakeholders listed above, particularly in terms of their knowledge, position, interest, alliances, resources, power, leadership in addressing disinformation, misinformation and hate speech; and
- To develop action plans among relevant stakeholders to address the breadth and depth of the weaponisation of information in the Asian region.

06:30-08:30	Breakfast <i>Venue: B-one Buffet Restaurant, B1 The Sherwood Taipei</i>
08:30-09:00	Registration <i>Venue: Ching Room Foyer, 3/F The Sherwood Taipei</i>
09:00-09:15	Opening Session

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

	<p><i>The opening session aims to set the tone for a more detailed discussion of the workshop theme, “Defending Democracy Against Disinformation: Stakeholders’ Analysis and Intervention”, in the succeeding panels. More specifically, it hopes to respond to the general question: “How can liberals and democrats defend and strengthen democracy amidst the scourge of disinformation, misinformation and hate speech?”</i></p> <p><i>Session Chair</i></p> <p>Chih-Wei Chen CALD Secretary General Deputy Director for International Affairs, Democratic Progressive Party, <i>Taiwan</i></p> <p><i>Opening Remarks</i></p> <p>Ching-Yi Lin, MP Director, Department of International Affairs Democratic Progressive Party Member, Legislative Yuan, <i>Taiwan</i></p> <p>Mahmoud El Alaily Former President, Arab Liberal Federation Party Leader, Free Egyptians Party, <i>Egypt</i></p>
<p>09:15-10:30</p>	<p>Session I: Understanding the Ecosystem of Disinformation, Misinformation and Hate Speech</p> <p><i>The spread of disinformation, misinformation and hate speech is based on a complex network or interconnected system of actors, process and strategies. How this ecosystem functions and thrives must be understood so that appropriate interventions could be made. This session gathers experts from media, civil society and politics to make sense of the complex but interrelated ways information is weaponised in the digital age.</i></p> <p><i>Session Chair</i></p> <p>Jaslyn Go Singapore Democratic Party, <i>Singapore</i></p>

40th CALD Executive Committee Meeting

Democracy 4.0: Innovating Democracy Through Technology

Defending Democracy Against Disinformation

	<p><i>Speakers</i></p> <p>Rosalind Liu CoFacts, <i>Taiwan</i></p> <p>John Nery Philippine Daily Inquirer, <i>Philippines</i></p> <p>Nangamso Kwinana Coordinator, Africa Liberal Network, <i>South Africa</i></p> <p>Silvia Mercado Coordinator, Red Liberal de America Latina (RELIAL), <i>Bolivia</i></p> <p><i>Open Forum</i></p>
10:30-10:45	Coffee/Tea Break
10:45-12:00	<p>Session II: Dealing with Disinformation and Hate Speech during Elections</p> <p><i>In the recent electoral exercises in the Philippines, Malaysia, Taiwan, Thailand Indonesia and India, disinformation and hate speech figured prominently, resulting in decline of civil discourse, absence of substantive political debate and a highly polarized society. In Hong Kong, Cambodia, Philippines and Singapore, disinformation has been weaponised to target political opponents or dampen political support for the opposition. Worse, in countries like Myanmar, India and Sri Lanka, disinformation and hate speech are said to contribute to the persecution of ethnic and religious minorities. In this session, the impact of disinformation and hate speech will be analyzed in the context of recent elections in Indonesia and the Philippines.</i></p> <p><i>Session Chair</i></p> <p>Francis Gerald Abaya, MP Liberal Party of the Philippines Member of House of Representatives, <i>Philippines</i></p> <p><i>Speakers</i></p> <p>Bambang Harymurti Senior Journalist and Former Chief Editor of Tempo, <i>Indonesia</i></p>

12:00-13:15	<p>Lunch <i>Venue: Yuan Room, 3/F The Sherwood Taipei</i></p>
13:15-14:30	<p>Session III: Legislating to Address Digital Disinformation</p> <p><i>In recent years, a number of countries in Asia have established task forces, convened select committee hearings and have proposed or passed legislation to combat digital disinformation. However, as UNESCO (2018) observed, “new and stringent laws are scapegoating [genuine] news institutions as if they were the originators, or lumping them into broad new regulations which restrict all communications platforms and activities indiscriminately. Such regulations also often have insufficient alignment to the international principles requiring that limitations on expression should be demonstrably necessary, proportional and for legitimate purpose. Their effect, even if not always the intention, is to make genuine news media subject to a ‘ministry of truth’ with the power to suppress information for purely political reasons.” In this session, existing or proposed Asian legislation to combat digital disinformation will be compared with laws from other regions, particularly on how they balance the need for regulation and respect for fundamental freedoms.</i></p> <p><i>Session Chair</i></p> <p>Huwaidiyah Pitsuwan Useng Former Member of Parliament Democrat Party, <i>Thailand</i></p> <p><i>Speakers</i></p> <p>Robin Ramcharan Executive Director, Asia Centre, <i>Thailand</i></p> <p>Zachary Lampbell Legal Advisor, International Centre for Non-Profit Law, <i>United States</i></p>
