Smart Prevention—Dengue Fever Mobile Epidemic Prevention Decision-Making Platform

- Marks dirty points, Breteau level, and easily flooding area...etc, Division epidemic prevention area in line with street and provide in formation of epidemic prevention decision.

- The “Gnat Fighter” information platform (https://am.geohealth.tw/) provides the public for the information of locations of where mosquitoes with diseases are frequently found.

The area about easily flooding, sewage pipeline, range of eliminate, rainfall data, information of vector mosquito and data of tube points.

Vector mosquito monitor: The distribution situation of Breteau is update everyday.
Smart Prevention—The Pingtung Disaster Prevention App

- According to the location service, map data, disaster prevention data, disaster prevention and response information, plan the evacuation route in advance.

- Provides **Integrated information** on geochemical meteorological services, disaster prevention warning information and open materials for various disaster prevention related units, and customized disaster prevention action application platform.

- Provide regional meteorological forecasts, agriculture and fishery meteorology for various townships within the jurisdiction.

- Stable service quality with Microsoft® **Azure Cloud Service** and Youtube Image Encoding Service

- Cooperate with the local private sector fourth industry to release disaster prevention information during the disaster.
Smart Prevention—Mobile Disaster Relief Information

- The "Smart Firefighting Action and Disaster Relief Integration System" integrates the physical network technology and GIS platform to master the scene, command, vehicle and manpower dispatch, fire water source and public dangerous goods information of disaster blocks, improve rescue efficiency and reduce disaster losses.

- Actively warn the disaster information at nearby important cultural relics such as historical sites and buildings, and immediately dispatch firefighter for action.

- The 「Emergency Management Information Cloud」 collects disaster information, the system automatically assigns disaster relief units, and all relevant units directly report cases to the system to facilitate case control and tracking, and strengthen the effectiveness of the disaster.
Smart Prevention—
Pingtung County Water Monitoring System

- The county has **45 rainfall stations** and 4 tidal stations, which automatically report hourly data. Through the 43 On-Bridge Water Level stations, water level is monitored by radar waves, along with 34 video to provide accurate data and images.

- There are **91 mobile pumps** in the southern Pingtung region that reports immediately data for location and pumping information.

- Integrating GPS, unit operation signals, and cloud data platform to provide information for large mobile pumping equipment with location, pumping switch, estimated pumping volume and carrying movement…etc, and to control data for disaster relief and supports of decision making.
Kenting Go—The HenChun Peninsula 4G Smart-Travel Service Plan

- Integrates services of businesses and markets of the peninsula, provides Deep-Travel Experience Service and Social network Analysis Service, and builds innovated service and market promotion.

Demand-Reflective Transportation Service

- Utilizes and integrates sources of different aspects, with the core value of “customize and user payment” of DRTS, solving the transportation demand and issues of suburban townships (chunri).
Smart Transportation—Pingtung County Bus Information System

- Provides information of bus and shuttle in the county and in the city (approx. 80 routes), including real-time location of the buses and history traveled paths.

- Users may proceed to the bus stop accordingly to the estimate arrival time of each buses, sufficiently decrease uncertainty while waiting and wait time.

- Public units may refer to the travel data of the transportations for administrative assessment and operation subsidize.

- Corporation may use the data for vehicle and schedule adjustment, as well as drivers management.
Smart Energy—Solar Farm and Solar School

Solar Farm
- The total capacity of the solar power generator is **23.4 million MW**, Annual increase in renewable energy generation is 31 million kWh, annual carbon dioxide reduction is approx. 16,420 tons.

Solar School
- Estimation of solar power generation of 16.8 million kWh, annual carbon dioxide reduction of approx. **8,879 tons**. The power generated can also make up for the budge of schools in the county.
Under the leadership of the Pingtung County Magistrate Pan Men-An, the population of installation of smart classroom has been increased to 100% (205 schools and 2602 classrooms), achieving the goal that every class as tablet, and every school has interactive monitors.

**Smart Internet**
- renewed internet equipment at 205 school and 2602 classes
- Installed net switch and NAS (stores digital course materials)
- Replaced backbone, firewall, Edge switch, 2 Net-base at every classroom
- Every two classroom has an AP
- Systems including “smart online management system” at the Information Education Center, Log and Audit System, Internet management system, Internet control device

**Smart Classroom**
- 層次三(創新教學) Innovative Ed
  - 層次二(互動教學) Interactive Ed
  - 層次一(輔助教學) Auxiliary Ed
The 「Pingtung County Land Administration iService」 application provides **online services** to the public including case status (registered cases, measuring cases, transferred cases), announcement of present value and land pricing, land section code look ups, case notification...etc.

Through **active notifications**, the system will notify the user with the information of case status.
Smart Government—Pingtung County Stamp Digitalized System

- With the digitalized stamp system, man-made mistakes would decrease, and the procedures of case reviews can be sped-up.

- Cross-Regional Service within the county allows the public to choose close-by administration unit to proceed their cases, saving not only time but the cost for transportation. From 2016 September to end of this July, **21,982 cases** have been processed.

- As each stamp cases saves 40 minutes of transportation time, the application saves approx. **879,280 Hours** annually.

- Provides sub-system services including administration management, household administration, forms, and information to increase efficiency.
The 「Pingtung Household and Military-Service App」 mobile service provides online application and appointment for household administrative services, in order to save time at desks.

With the digitalize data, it provides cross-regional service of Household Certificate Application. From 2016 to this July, 177,386 cases of in-county certificates have been issued, and 140,119 case of out-of-county certificates have been issued, as well as serving 200 people daily.

Cross-office services including land administration, tax, DMV, insurance guild, health care, Taiwan Water and Taiwan Power...etc, people may first proceed related needs at the Household Administration Office, then apply to renewed household certificate to up-mentioned units. Between 2017 to end of this July, 238,618 cases has been served.
Smart Government—
Mobile Local Welfare Service

- With mobile devices, officers can actively visit underprivileged households to assist with services of social welfare application.

- Integrates laws and regulations, provide related social benefit for people of different background to obtain assistance accordingly.

- Provides information related to social welfare institutions for users to search for matters such as business hours, service details, contact...etc.
Smart Government—Pingtung County
e-Road Construction Network

- The government created a road database and excavation management system for pipeline unit to apply for construction and related authority to review.

- Integrated pipeline data in the system can be used for related units and authority to search. Pipeline units may look for pipeline location before construction, in order to adjust actions accordingly to avoid incidents.
ISSUES GOVERNORS FREQUENTLY ENCOUNTER

• How to follow up with cases regarding receiving of subsidize or assistance from the Central Government in time?
• Ways to manage the progress of each project?
• What’s the execution outcome of important plans?
• Effective coordination and communication between units?
• Raising execution rate of budget?
• Specific governance objective and annual result?
Smart Governance: Cloud Project Administrative System

1. Lighten Office Stress
2. Ask for Specific Progress
3. Search for Needed Info
4. Manage what’s behind Bilateral Coordination
5. Regulate Due Dates
Achieving Governance Goals

- Total important projects managed in the past 3 years: 4,461 cases
- On-Going: 1,340 cases
- Closed Case: 3,121 cases
- Total Budget: 73.7 billion 18 mil.
Residents Approve Governance Outcome
Pingtung’s FIRST 5-star leader in the history
Resident Satisfaction rate reaches 75.7%
Highest Satisfaction rate among 13 counties in Taiwan
Ranking on Top 3 in Taiwan

Uncultivable land for Green Energy

Smart Transportation
1. **First in the Nation** Green Energy:
   - Stop Extract of Underground water \(\times\) Land Recuperation \(\times\) Participation of Residents \(\times\) Sell to the Taiwan Power

2. **Location and Area:** LinBien Township \(\times\) JiaDong Township \(\times\) about 43.4 Hectares

3. **Benefit:**
   - **Total Power Generated:** 23.465MW
     - (Annually: approx 31 million kWh)
   - **Covers 0.7%** of energy used in the county
   - **Annually decrease 16,000 Tons** of carbon dioxide emissions
     - (equivalent to carbon reduction of 1,074 hectares of afforestation)
1. Smart Parking Center: manages parking in the city

2. Implement **Smart Magnetic Sensor Technology**
   - **Resolves lack of information on parking:** Provide real time data
   - **First in the Nation:** Covers toll parking x Entire city

3. Install digital display for free parking spots

4. Drive-Thru Station: **Nation Only** Smart street-side parking
Pioneer of the Nation
Innovated Governance

- Old School District Reconstructed as Elder Care-Service Locations
- Agriculture, Forestry, Fishery and Husbandry Included for Occupational Injury/Disaster
- Agriculture University
- Insurance for Farming Fishery
- Mobile Pharmacist
Old School District
Reconstructed as Elder Care-Service Locations

1. Specialized Location for Elder-Care:
   Old Jiu-Ru Elementary School × Near National Highway × Easy Transport

2. Increase Benefit of Existing Building:
   ✓ Amenity: Healthy Activity for Elders × Day-Care Functions
   ✓ Full-Service: From Young to Old × Integrate Community Resource
   ✓ Healthy × Subhealthy × Disability

3. Child-Care Resource Center × Kids Play Area
1. Establish in 2015

2. Application Qualification:
   Register Residency in Pingtung County
   x Over 18 Years Old

3. Features:
   ✓ Academic Units x Industry Team x Indoor Courses
     x Site Surveys
   ✓ Implement the “Agriculture 2.0” concept
     (ex. Pest management x Cost analysis)
   ✓ Assembly : Centralize Consensus x Governance
     Promotion x Provide Agricultural Information

4. Benefit:
   ✓ Train New Forces : 673 People
   ✓ Enhance Agricultural Development
     x Increase Management Soft Power
   ✓ Build Quality Brand Image of Agricultural Product
1. Farmer Occupational Disaster Insurance (Since 1st Nov 2018):
   - Up to July 2019: 19,029 people Applied
   - Cases issued O.D.I payment: 20 cases

2. Overall Care: Farmer and Fisherman
   - Injured during work

3. Increase Safety Protection:
   - Injury Payment
   - Disability Payment
   - Medical Allowance
   - Funeral Allowance
Insurance for Farming Fishery

1. Insurance based on rainfall data (Since 2017):
   - P.T. Gov x Council of Agriculture
   - x Taiwan Fire and Marine Insurance Co.
   - Accumulative Rainfall: continuously 48 hours x rain level reaches 523 millimeter
   - Remit site-survey

2. **Object:** Fishery-farmers of Donggang, Lingbien, Jiadong, Fengliao

3. **Expanded Service Coverage** in 2018:
   - inland aquaculture area in the county

4. **Application count:** 67 people
   - 62.84 Hectare x Insured Amount: Over 95 million

5. **Claim amount:** Over NT.47 million
   - (Total of 55 Households)
1. Passive → **Initiative**
   - **Assist** patients receive medicine
   - **Direct visit to homes**: Elders × In-Home Care-Taker
   - **Observe Patients**: Living Envir. × Dietary Habits
   - **Provides** practical advice on home treatment

2. **Medicine × Community Care**
   - Community Care Center × Culture Health Station
     × Community Assembly Spot
   - Medicine Advisory × Health-Education Service
   - **Assist**: Elders × Mobile Disability
     × Township Medical Resources for Minority
   - **Number of Mobile Pharmacist**: 42 People
One & Only in the Nation

- Dementia Park
- Indigenous Teaching Materials
- Elementary After-School Care Extended to 18:00
- Long-Term Care included to Middle School Special Skill Course
1. Location: ZhuTian Township XiShi Village in P.T.

2. Localized Model Community:
   ✓ Hakka Ethnics x Tough&Strong x Solidarity
   ✓ Humanistic Care x Community Friendly Protection Zone

3. Chengong University Academic Team:
   Assist with planning friendly community

4. Promote Community Friendly Stores and Housing
   x Assist Community Leveled Educational Trainings

5. Future Plan:
   Dementia Day-Care Center x Dementia-Friendly Network

6. Goal:
   Bring Elders Outdoor x Aging Friendly City Culture
2. Indigenous Teaching Materials

   - Second largest tribe to the Amis tribe
   - Respect Minority Ethnicity Cultures and language: Cultural Identity x Provoke Interests in Learning
   - Elementary (1st to 6th Grade)
     x Mandarin, Math, Science, English

2. Revolution of Textbooks
