SMART MOBILITY

CALD EVENT in BANGKOK, THAILAND - 2022.
By Mohammad Yusuf Wuisan
TRANSPORTATION IN INDONESIA ESPECIALLY IN OUR CAPITAL CITY JAKARTA IS FAR BETTER THAN BEFORE ESPECIALLY USING SMART MOBILITY SYSTEM. THERE’S A LOT OF TRANSFORMATION IN OUR TRANSPORTATION (PUBLIC AND PRIVATE) BECAUSE PUBLIC TRANSPORTATION IS VERY MUCH NEEDED FOR OUR PEOPLE. THE DEMAND OF THE PUBLIC TRANSPORTATION IS HIGH.
MRT
MASS RAPID TRANSIT

HIGH SPEED RAILWAYS
(COMING SOON IN 2023)

LRT
LIGHT RAIL TRANSIT
(COMING SOON IN 2023)
It is quite far and need a lot of time to reach our public transportation so you have to use the motorbike transportation to reach another public transportation which is expensive. So we still need a lot of improvement in our Smart Mobility Public Transportation to make it easier, cheaper, and efficient.

- Congestion.
- Pollution.
Electric Public Transportation

Gas Prices

Smart Mobility - CALD
a policy in Jakarta called Odd and Even Licence Plate where only a Car with Odd or Even licence plate can go through the road from 4PM to 9PM based on calender. It used to be 3 in 1 where only a car with more than 3 people can go through
A Private Sector Company called GOJEK created a huge reformation for our SMART MOBILITY in Indonesia as they created a motorbike and car application to make the motorbike transportation easy, safe and also with a reasonable and set price. Not just that, anyone who have a motorbike or car can also join GOJEK and take people to their destination and get money from the application. So the Driver is totally supervise by GOJEK.
